

## Mozilla Firefox 1.5 Released

by [Jasen Lawrence](#)

Published December 13th, 2005, 12:56pm CST

The newest version of the [Mozilla Foundation's Firefox web browser](#) is out. One of the best features is the new auto-updating support. This allows even the most forgetful internet user constant protection. On top of that it is also the first browser to meet [US federal government requirements](#) that software be easily accessible to users with physical impairments. The new version even seems faster than the old, despite all the great new features. Better RSS support and a redesigned, easier to navigate, settings system. All-in-all the best browser on the internet is now even better. Some of the other features new to version 1.5 include:

**Faster browser navigation** with improvements to back and forward button performance. **Drag and drop reordering for browser tabs.** **Improvements to popup blocking.** **Clear Private Data** feature provides an easy way to quickly remove personal data through a menu item or keyboard shortcut. **Answers.com is added to the search engine list.** **Improvements to product usability** including descriptive error pages, redesigned options menu, RSS discovery, and "Safe Mode" experience. **Better accessibility** including support for [DHTML accessibility](#) and assistive technologies such as the [Window-Eyes 5.5 beta screen reader](#) for Microsoft Windows. Screen readers read aloud all available information in applications and documents or show the information on a [Braille display](#), enabling blind and visually impaired users to use equivalent software functionality as their sighted peers. **Report a broken Web site wizard** to report Web sites that are not working in Firefox. **Better support for Mac OS X** (10.2 and greater) including profile migration from Safari and Mac Internet Explorer. New [support for Web Standards](#) including SVG, CSS 2 and CSS 3, and JavaScript 1.6. Many security enhancements.
